*“Light up for
the future”*

LED LIGHT FOR CAMBODIA

*On behalf of **SAMAKY GROUP**, I would like to send my greetings and sincere thanks to all our Valued Customers and Partners for your trust and support us throughout the past time.*

The electricity and lighting sector from its inception to now has developed tremendously to become an energy industry that effectively supports all sectors and fields in socio-economic life. However, electrical and lighting equipment's in the Asia market have a lot of energy costs as well as the harsh weather condition which make the construction projects difficult in the process of construction and maintenance.

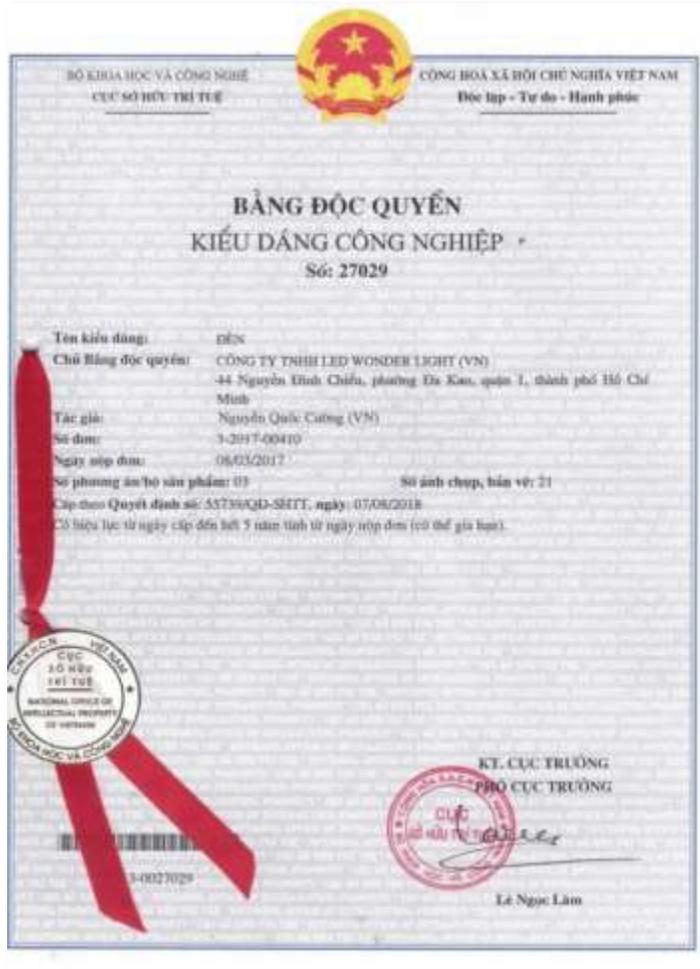

***SAMAKY GROUP** decided to develop the lighting and electrical equipment manufacturing industry with **LED WONDERLIGHT - VIETNAM** Company was founded with the goal of supporting Customers to access and use effectively electrical appliances and lighting products manufactured with high technology standards, low energy consumption and suitable with the terrain of Vietnamese climate. Since our company was founded, we have been dedicated to invest in technology research and distribution of prestigious products from corporations of developed countries in the world. Up to now, we have made continuous development in the field of designing, manufacturing and distributing high quality lighting equipment's and serving construction for many works, key projects in Asia market.*

With the advantage of the component quality and design technique, maximum localization ratio, our products meet the best about: The light, durability, the response time, the price policy, after-sales service ... and professional serving spirit, we would like to bring you high quality LED products at the most reasonable price, always bring satisfaction to cooperative units and investors

Yours faithfully,

SAMAKY
Human to Human

Vertical Axis Wind Turbine

Business applications and power generation using vertical small wind generators

Quiet wind generator with light weight, high efficiency and price competitiveness, power generation enterprises use it and promote application business combining IT & IoT technology

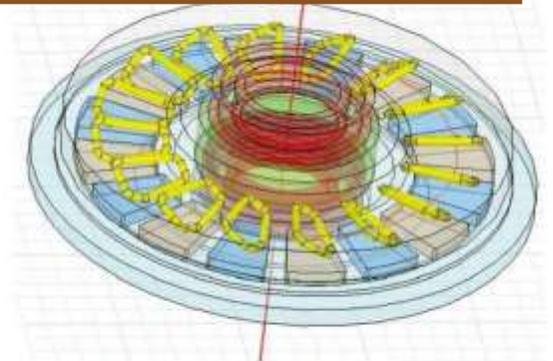

Has the best internationally recognized small wind power technology

Wind power structure and technology

Specification

Rated Power	300W
Wind wheel diameter	1.23M/1.09M
Weight	59.5 lb/27KG
Blade Material	Aluminum Alloy
The number of blade	3
Minimum wind speed start	1m/s (2.24mph)
Minimum power wind speed	2.7m/s (6.04mph)
Rated wind speed:	12m/s (26.84mph)
Maximum cut off wind speed	15m/s (33.55mph)
Resistant to wind speed limit	65m/s (145.40mph)
The type of Generator	Three-phase AC maglev wind turbine
Controllor output voltage	12V
Controllor output current	<20Amp
Controllor brake system	Over speed automatic Three-phase Short-circuit braking
Normal operating temperature	-40~50 °C

Generator 3-Dimensions Magnetic Flux Density Simulation

Patent holding status of Hi Energy Korea Joint Stock Company

- Patent on wind generator
- Technological patent on wind generator (Method to link Darius and Savonius to generator)
- Technological patent on wind generator (Small wind power generation and acceleration system)
- Technological patent on wind generator (Dual axis wind power generation system)
- Technological patent on wind generator (Dual axis wind generator wind power system including accelerator)
- Technological patent on wind generator (Wind power system capable of direct displacement and conversion)
- Technological patent on wind generator (Wind power system for ventilation (vent))
- Technological patent on wind generators (Wind speed optimization vertical axis wind generator system)
- Wing technology patent (Darius and Savonius construction)
- Technical patents for generators (wind generators)
- Technical patent for controller (Wind power generation controller connection method)
- Patent technology for control system (generator and controller)
- Technical patent for structural improvement (Darius and Savonius structures)
- Technical patent for structural improvement (wind generator structure)
- Patent registration and registration in Korea and more than 20 countries around the world.

- **Hybrid security lights** use both wind and solar to ensure stable energy, and can convert wind energy for all directions in 360 degrees into electrical energy.
- The non-resisting rotation adopts a magnetic permanent magnet type generator structure that boasts efficient power generation by generating acceleration as well as operating the wind.
- In addition, the mechanical noise is completely resolved by the magnetic method, and the aluminum surface treatment and round structure ensure the mechanical stability to provide a more comfortable street environment.
- Recognized for outstanding performance with eco-friendly energy equipment through annual CO2 reductions for solar security lights that reduce 150 kg and hubryd security lights that reduce 470 kg.
- *(Street lights generate 195~615kg CO2 annually)*

풍력 발전기	300W 풍력 발전기 (HB-300)
램프(LED,UCD)	40~80W LED (80W이상 설치 가능)
태양광 모듈	100W~200W
가로등주	Steel (5~8m)
배터리(충전지)	12V 100Ah (풍력 및 태양광 전용 배터리)
제어 장치	하이브리드 컨트롤러 (풍력, 태양광)

Source: Internet Collection

General Specification

Wind Turbine	DS300 x1 set
PV Panel	130W~150W x2 pcs
Charger	WS320-24Vx1 set
Pole	9m set
Wind turbine	
Darrieus blades	3
Savonius blades	2 layer
Blades material	Anodized Aluminum
Axis material	Anodized Aluminum
Diameter	1.25m x 1.06m
Weight	25Kg
Generator	3 phases PMG
Rated power	300W
Solar panel	
Material	Poly-Crystalline
Open circuit V	32Vdc ~ 50Vdc
Max. power V	29Vdc~38Vdc
Efficiency	≧13%
Charge Controller	
Wind Charging	MPPT
PV Charging	PWM
Rated power	300W(Wind)/250W(PV)
Battery Voltage	24Vdc
Auto braking	Over speed/temperature
Spot Light	1Wx2 pcs
Street lamp	≦60W x1 pcs
12V Battery	100Ah~125Ah x2 pcs
Control Cabinet	Outdoor type x1 pcs

Premiumline Plus

Premiumline

Plus Mono 72-cell SolarPanel

GSM6-72 360W 365W 370W 375W 380W

Electrical Data, STC *	GSM6-72				
Nominal Max. Power (Pmax)	360W	365W	370W	375W	380W
Open Circuit Voltage (Voc)	47.44	47.67	47.81	47.93	48.06
Short Circuit Current (Isc)	9.77	9.84	9.89	9.95	10.11
Max. Power Voltage (Vmpp)	39.01	39.38	39.40	39.45	39.55
Max. Power Current (Impp)	9.23	9.27	9.41	9.51	9.61
Module Efficiency	18.60	18.80	19.10	19.30	19.60
Power Tolerance	±0 ~ +5W				

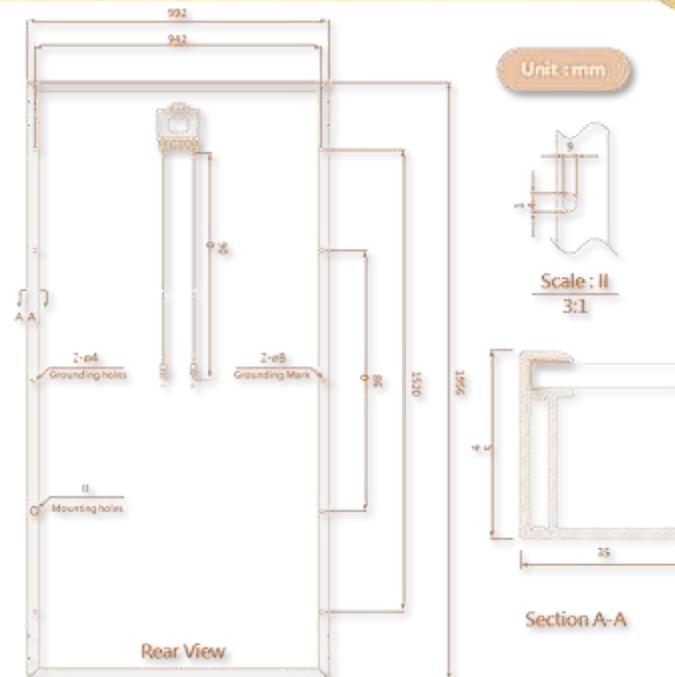

* Standard Test Conditions (STC): Irradiance of 1000 W/m², Spectrum AM 1.5 and Cell Temperature of 25°C.

Mechanical Data	
Dimensions	1956 x 992 x 40 mm
Weight	23 kg
Solar Cell	156.75*156.75mm Perc monocrystalline
Front Cover	3.2mm tempered glass with AR coating
Frame	Anodized aluminum alloy, original or black
Junction Box	IP65, 3 diodes
Cable	4.0 mm ² , 1000 mm
Connector	MC4 or MC4 compatible
Packaging	26 pcs /pallet, 672 pcs /40' HQ.container

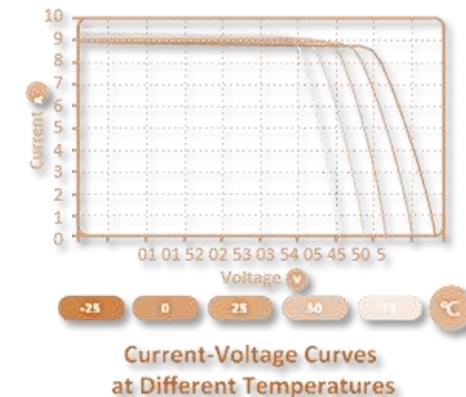

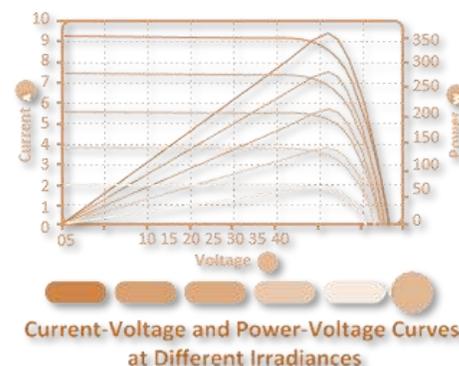

Temperature	
Nominal Operating Cell Temperature *	45°C ± 2°C
Temperature Coefficient (Pmax)	-0.41% / °C
Temperature Coefficient (Isc)	+0.059% / °C
Temperature Coefficient (Voc)	-0.33% / °C

* Nominal Operating Cell Temperature (NOCT): Irradiance of 800 W/m², Ambient temperature of 20°C, Wind Speed of 1 m/s.

Operating Conditions	
Max. System Voltage	DC 1000V
Operating Temperature	-40°C ~ +85°C
Max. Series Fuse Rating	15A
Mechanical Load	5400 Pa
Application Classification	Class A
Module Fire Performance	Class C

Specifications in this datasheet are subject to change without prior notice.

PROJECT

“MISSION OF US”

1. ESTABLISHMENT OF TECHNOLOGY APPLICATION RESEARCH CENTER FOR FOOD;
2. ESTABLISHED RESEARCH CENTER FOR PREVENTION HEALTH TECHNOLOGY – LAB CENTER;
3. DEVELOPMENT OF INGREDIENTS AND ORGANIC FOOD PROCESSING FACTORY;
4. MEMBER CARD ISSUANCE – INTEGRATING 4.0 TECHNOLOGY - ENHANCED CARD BENEFITS.;
5. SOLAR CLEAN ENERGY PRODUCTION - WIND ADVANCED TECHNOLOGY OF GERMANY - KOREA. FOR CAMBODIA.;
7. GOODS SUPPLY CHAIN DEVELOPMENT IN CAMBODIA - STABILIZING THE PRICES OF CONSUMERS SPECIAL FOOD, MEDICINE, MEDICAL EQUIPMENT FOR EVERYONE;
8. DEVELOPING FIRST AID KNOWLEDGE – IMPROVING CONSIDERATIONS AND KNOWLEDGES FOR EVIDENCE PREVENTION - ACCIDENTS AND DISASTERS FOR CAMBODIA PEOPLE.;
9. COOPERATION TO CONSTRUCTION SMART 4.0 – 5.0 INDUSTRIAL PARK PROJECT;
10. ESTABLISHMENT OF VOCATIONAL TRAINING CENTER, SUPPLYING EXPORT LABOR (JAPAN - KOREA - USA - EUROPE...);
11. ESTABLISHMENT OF PORTAL – PLATFORM – APP.;
12. ESTABLISHMENT OF THE SYSTEM - TRANSPORT GOODS BY E’CAR & E BUS FOR CAMBODIA;
13. DEVELOPING AREA OF MATERIALS SUPPLY FOR PRODUCTION ACTIVITIES,
14. SPECIAL PRIORITY FOR HIGH-TECH AGRICULTURE DEVELOPMENT.;

"ASIAN POWER"

AGRICULTURE STRATEGY CAMBODIA

- Favored by nature in terms of climate, soil, water resources, breeding stock & convenient transportation location for the whole Asia region.
- Increasing population leads to an increasing demand for food supply, farmers are not forced to improve the quality and quantity of agricultural and aquatic products.
- Therefore, high-tech agricultural models will be important tools to provide solutions to meet the living needs of farmers and to reduce unsafe food for Cambodia and Asia.
- As well as combining the model of logging, producing handicrafts and medical tools to increase economic development.
- With the vision is to establish a "global social and agricultural information network" from which there will be convenient conditions for the Parties to fulfill the mission of the project.

SMART CITY

INTRODUCE PROJECT

“BELLA” SMART CITY

IDEA – DESIGN CONCEPT

- PEACOCK - symbol of prosperity and rebirth of a new land.
- BELLA SMART CITY is a modern city with the world's leading smart technologies, cared for by experts to match and always blend into a pristine coastal land, favored by nature, tropical climate. The peacefulness is typical of the Southern region of Vietnam.
- BELLA SMART CITY is an artistic masterpiece that has been painstakingly built and created to bring a perfect living space, fully equipped and not separate from nature, to owners who are ready for smart and safe technologies, benefits of a modern urban 5.0. Recreate the beauty of nature and technology interwoven with oriental architectural lines combined with impressive modern technologies and environmentally friendly materials.
- Safety, modernity, convenience and always closeness to nature are the top criteria of a New Normal era.

HIGH-TECH APPLICATION AGRICULTURE

CROP SMART TECHNOLOGY BREED

- High-tech agriculture by Hydroponic and Aquaponic methods..
- Automatic Irrigation, Hydroponics, Breeding, Breeding and Research Center... Clean Energy (Solar Energy), Biomass Energy meets Global Gap, JAS, EU, USTA, IFOAM standards in combination with prevention and treatment solutions New fire technique, safe, environmentally friendly.
- Garbage and water treatment
- Medium... for short, medium and long term plants such as: Young ginger, Japanese sweet potato, fruit trees, medicinal plants...
- Combination of pig farming (Medical) & Australian beef.

SAMAKY
Human to Human

- Raw materials for the production of straws, bamboo chopsticks... (F&B) protect health & environment.
- Raw materials for processing Activated carbon for export & environmental treatment of wastewater.

- Supplying Fresh/Dried Bamboo shoots served in Chain Stores.
- Supplying Raw Materials for Cosmetic Industry at home & abroad.
- Give Crafts.
- Supplying Aquilla Eels at home and abroad.
- Provide natural nutritional drinking water.
- Provide medical equipment for medical examination and tre emergency.
- Provide solar power for the area.

- Outsourcing contract for eel products
